

GUIDELINE FOR CODING FINAL EXAM

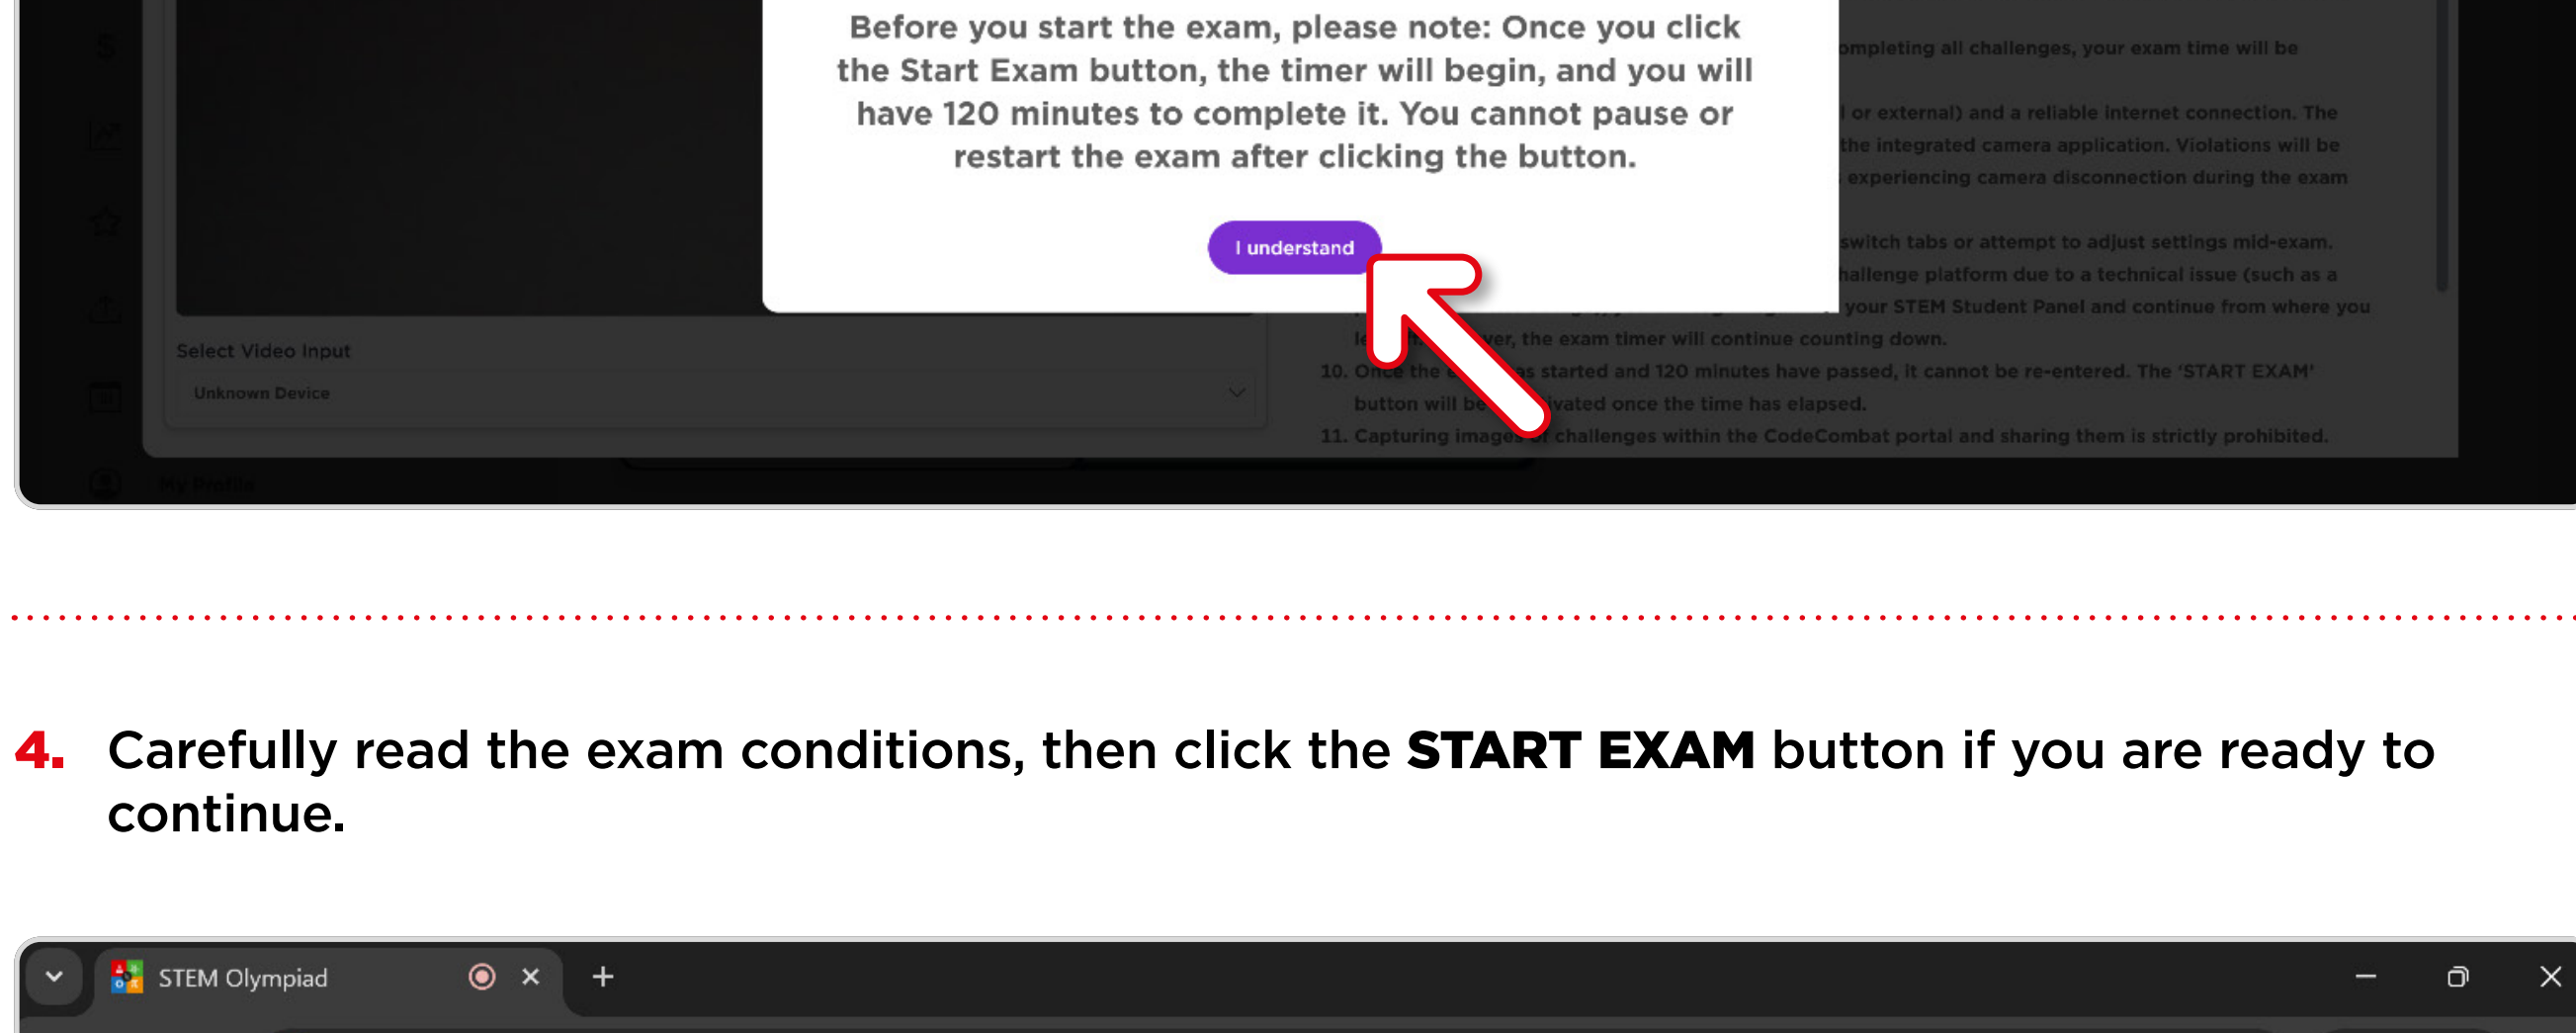

1. Log in to your STEM Student Panel and click the **START EXAM** button.

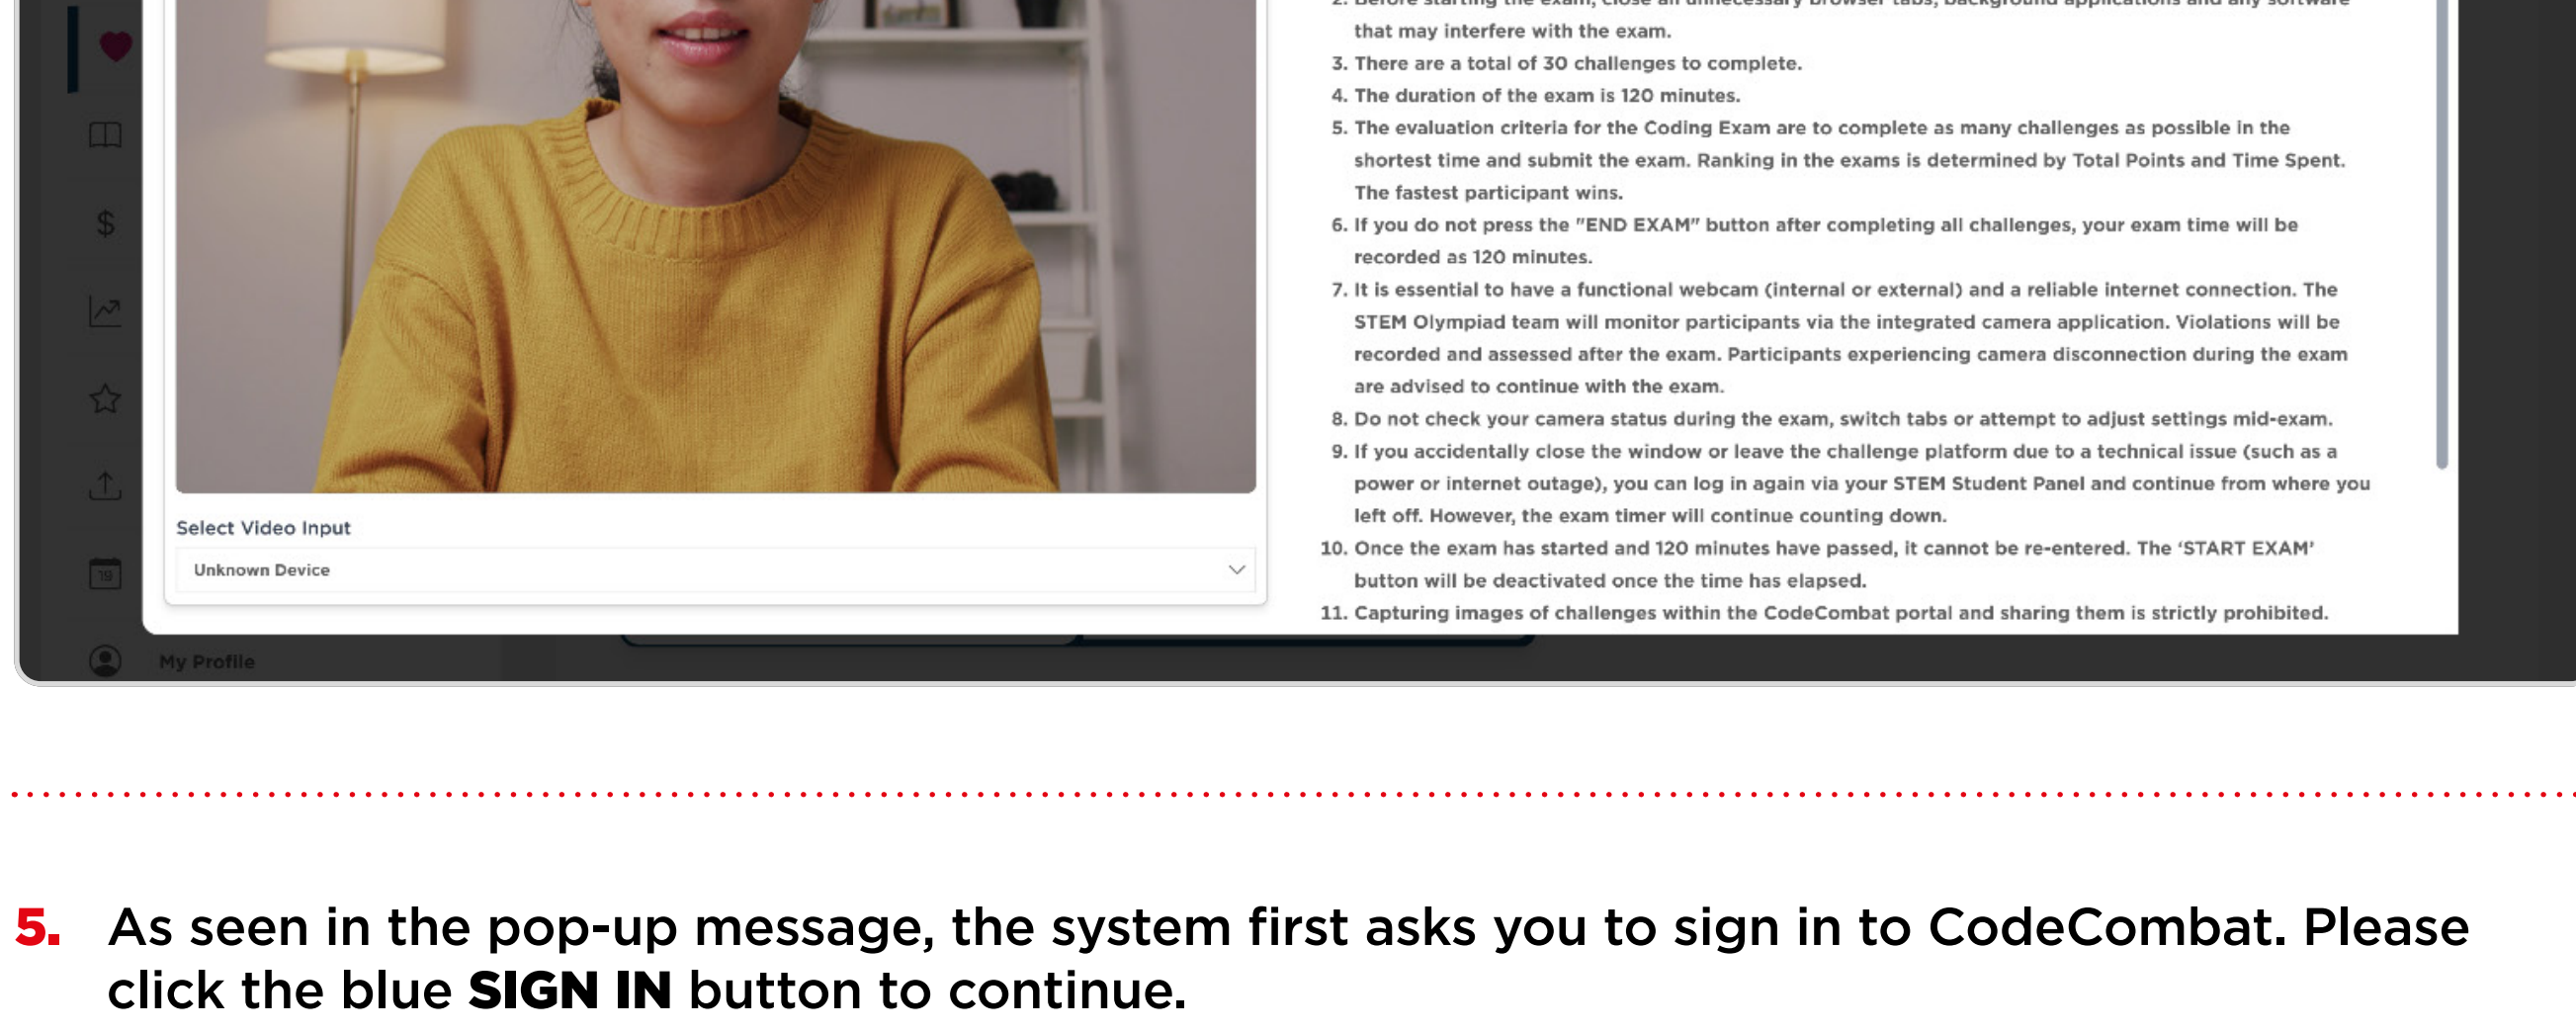

2. Click one of the **ALLOW** buttons to grant permission for the integrated camera application to record your activities during the exam.

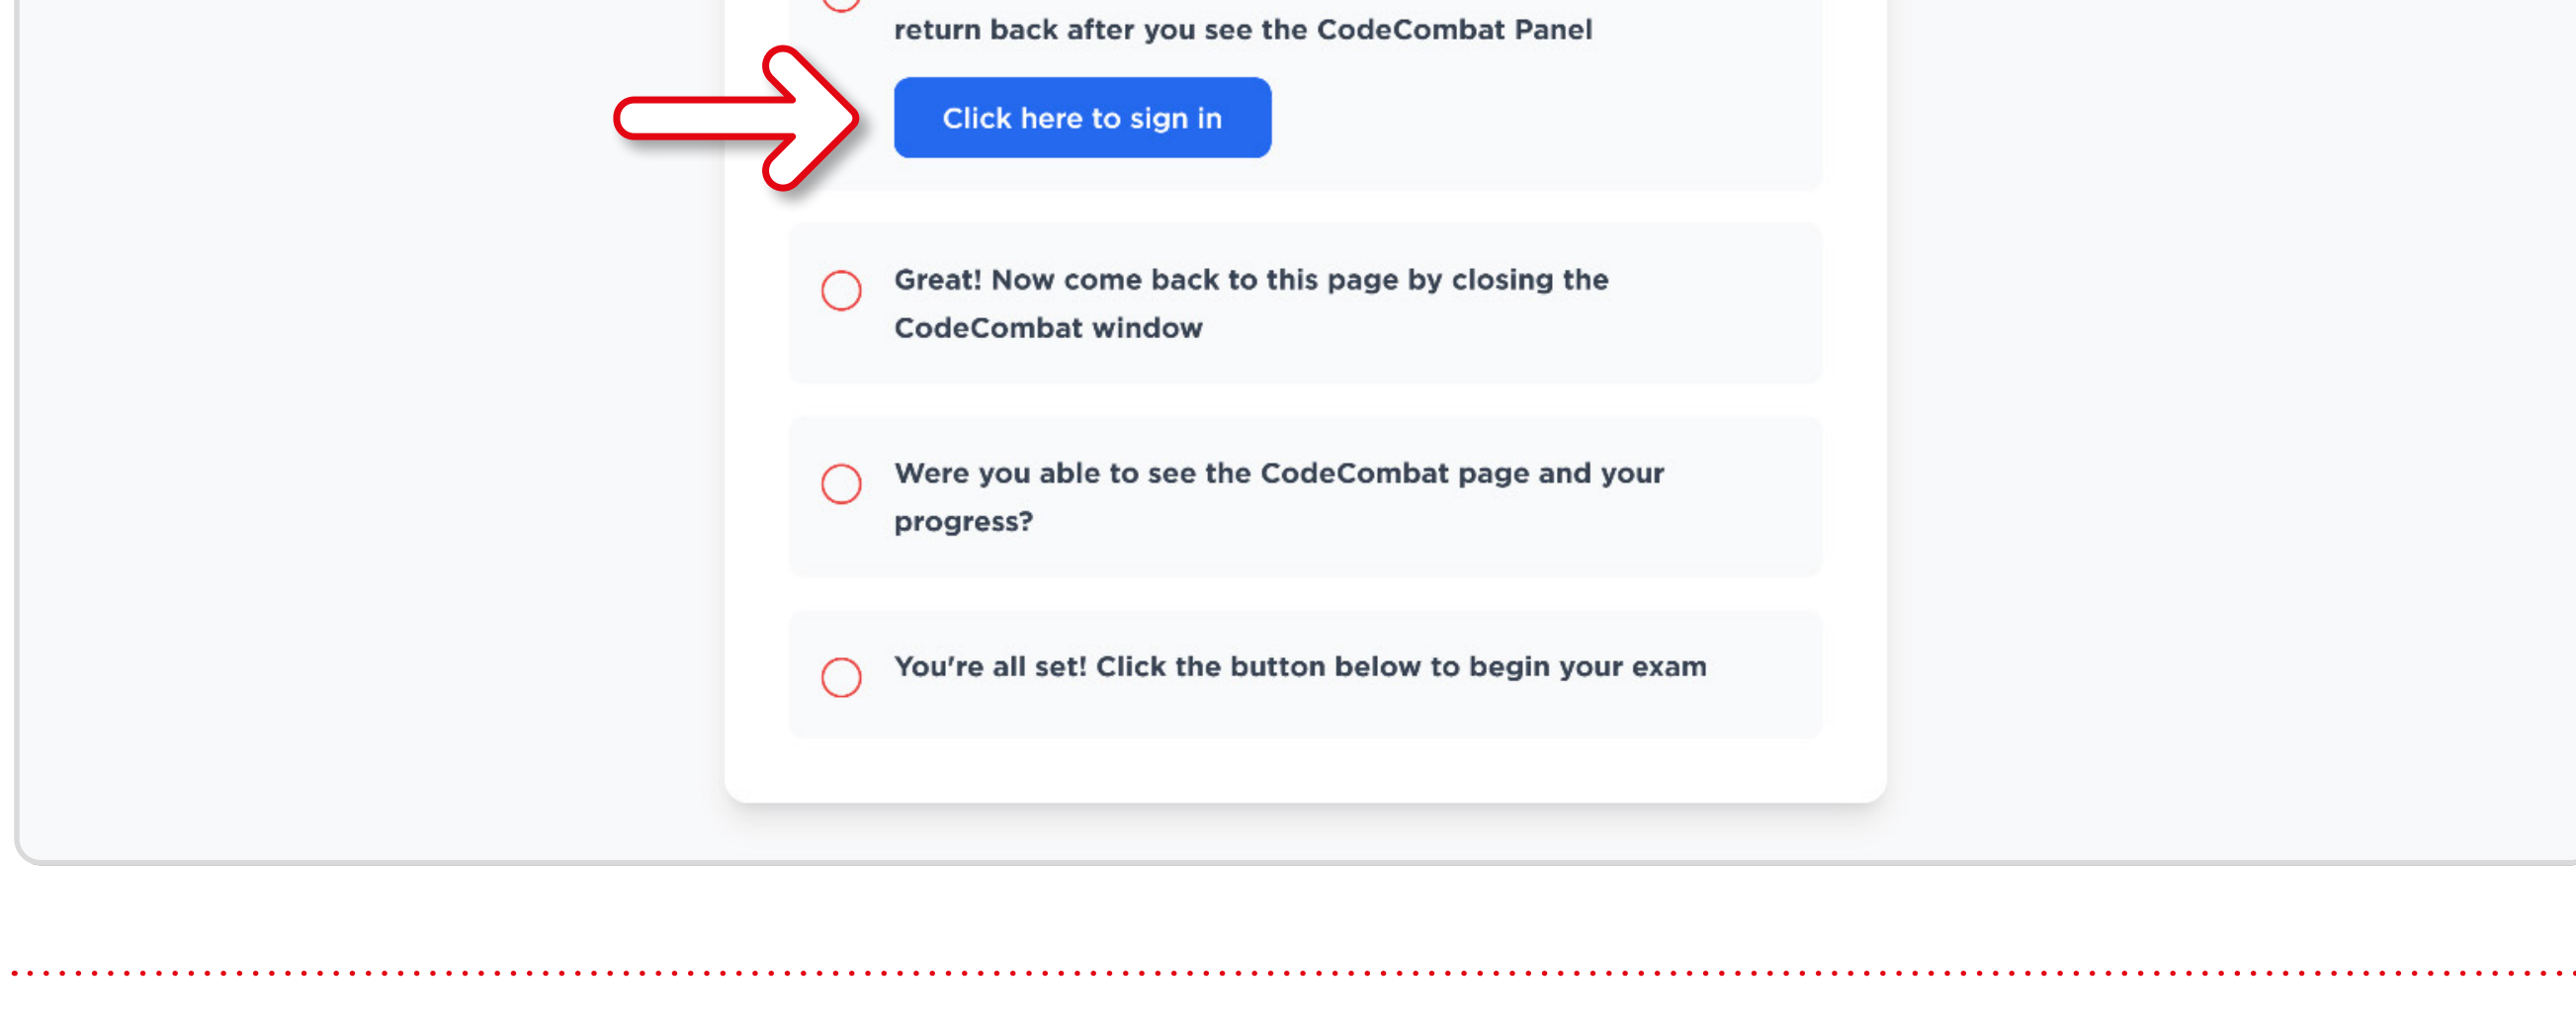

3. A pop-up will appear before you start the exam, informing you that clicking the Start Exam button will begin the timer, giving you 120 minutes to complete the test. You cannot pause or restart the exam after clicking the button. Click the **I UNDERSTAND** button if you are ready and want to continue to the exam.

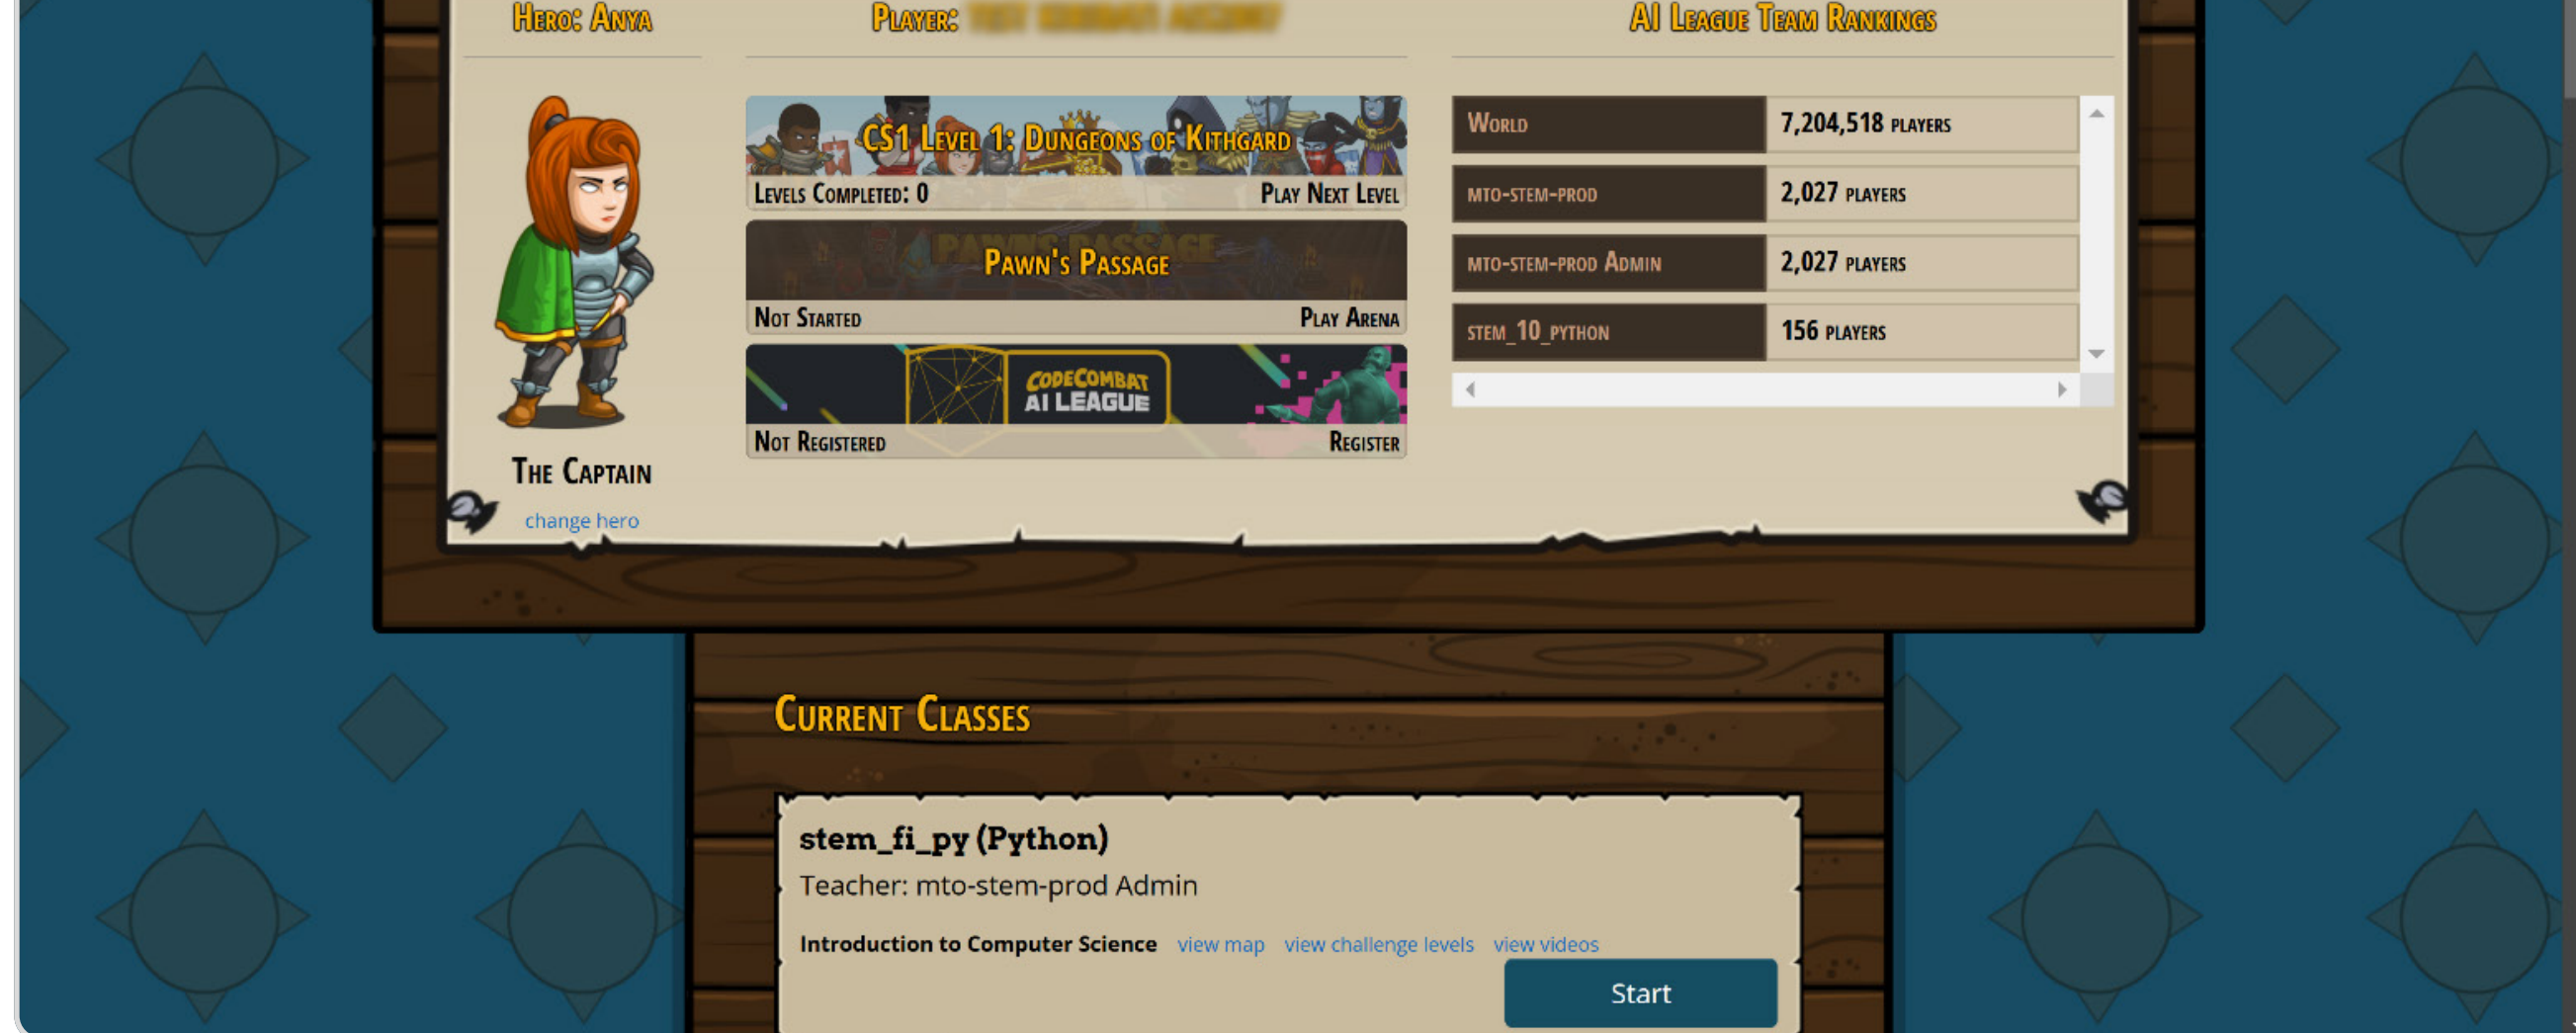

4. Carefully read the exam conditions, then click the **START EXAM** button if you are ready to continue.

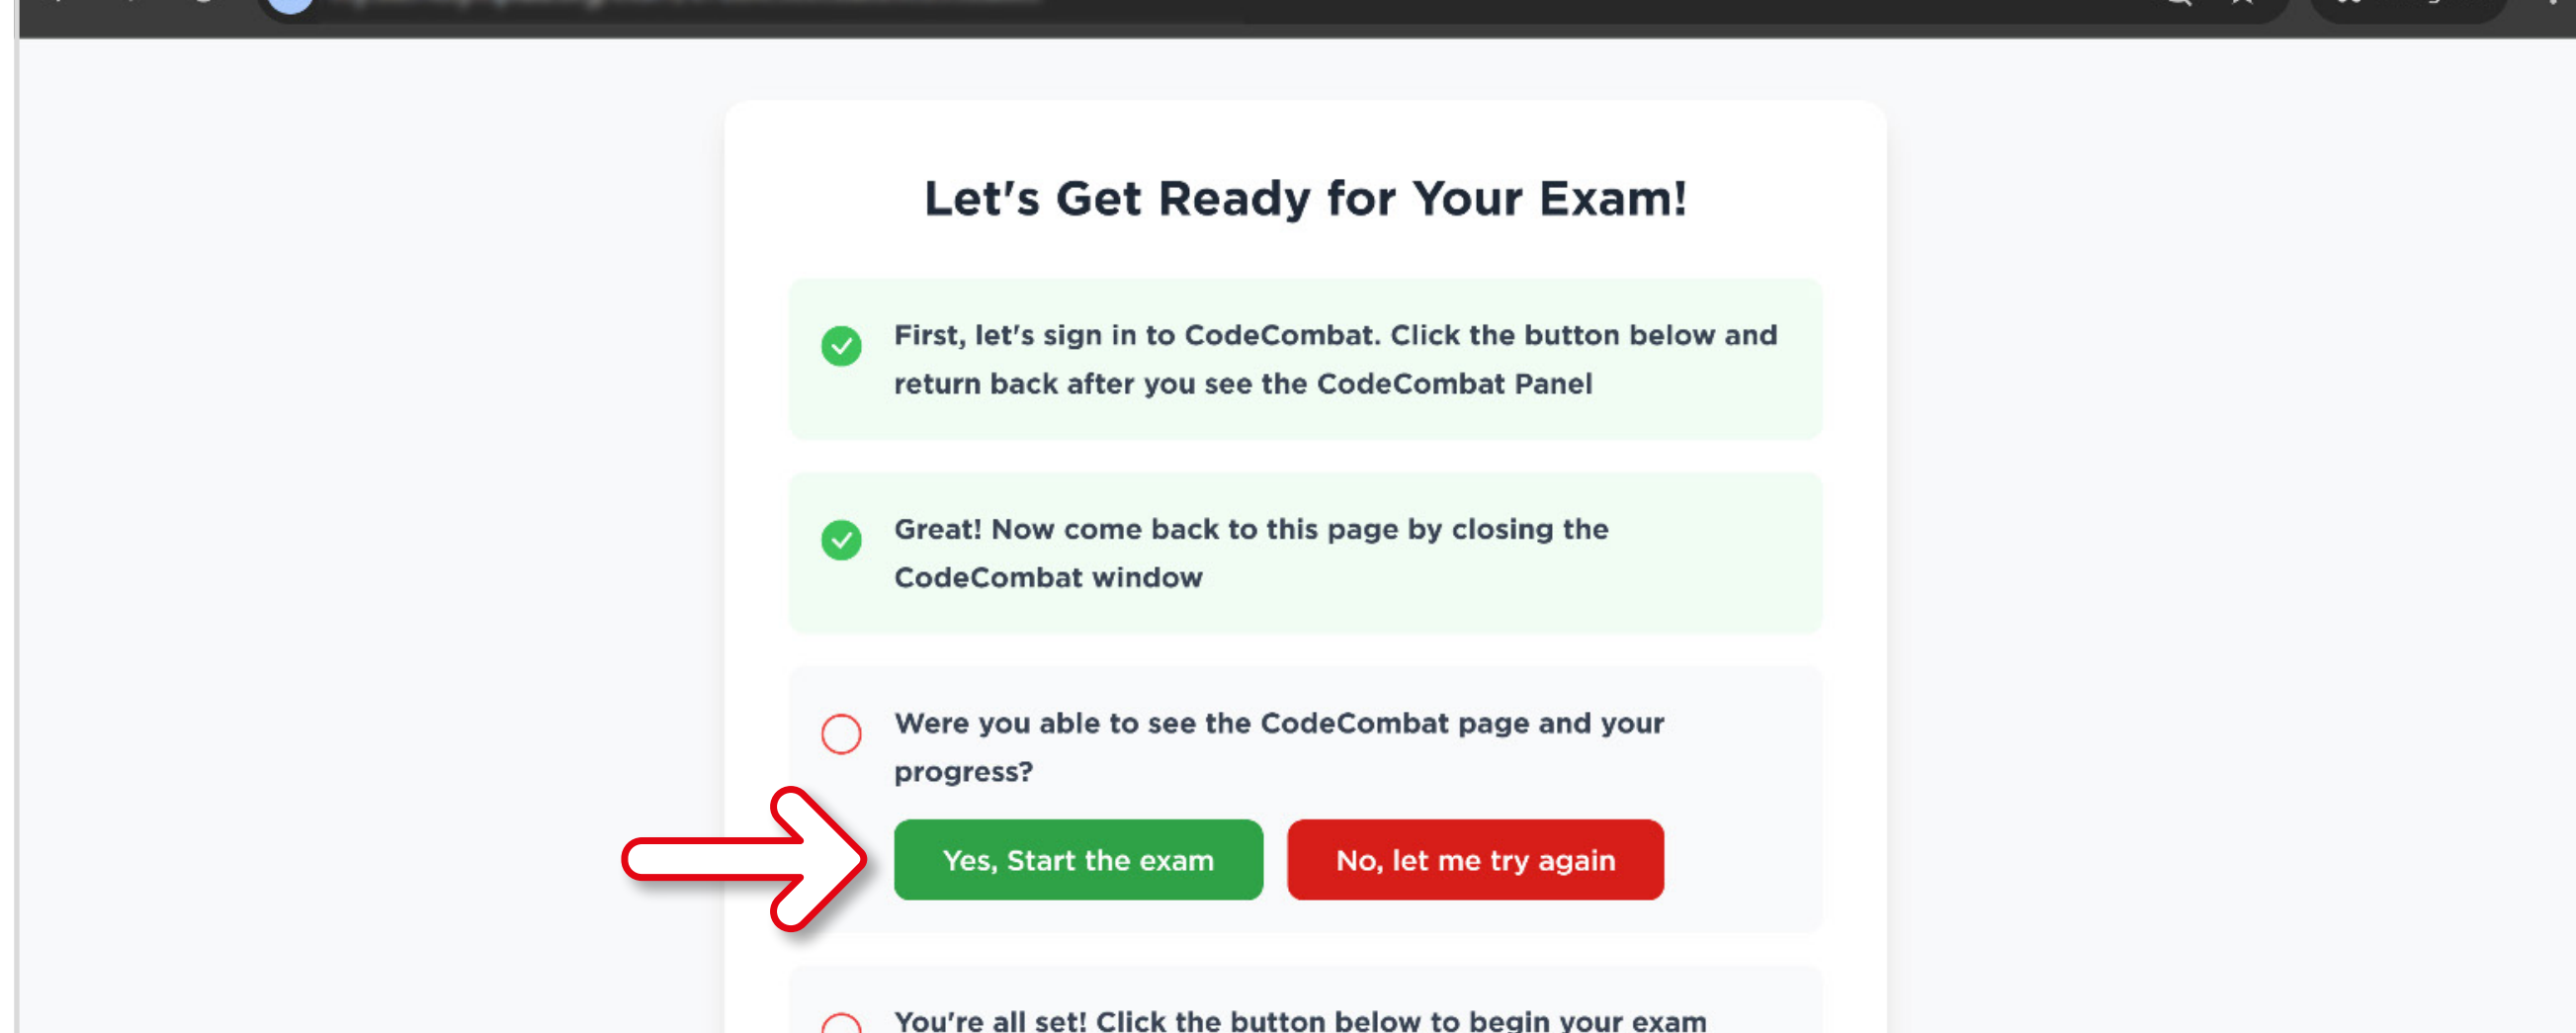

5. As seen in the pop-up message, the system first asks you to sign in to CodeCombat. Please click the blue **SIGN IN** button to continue.

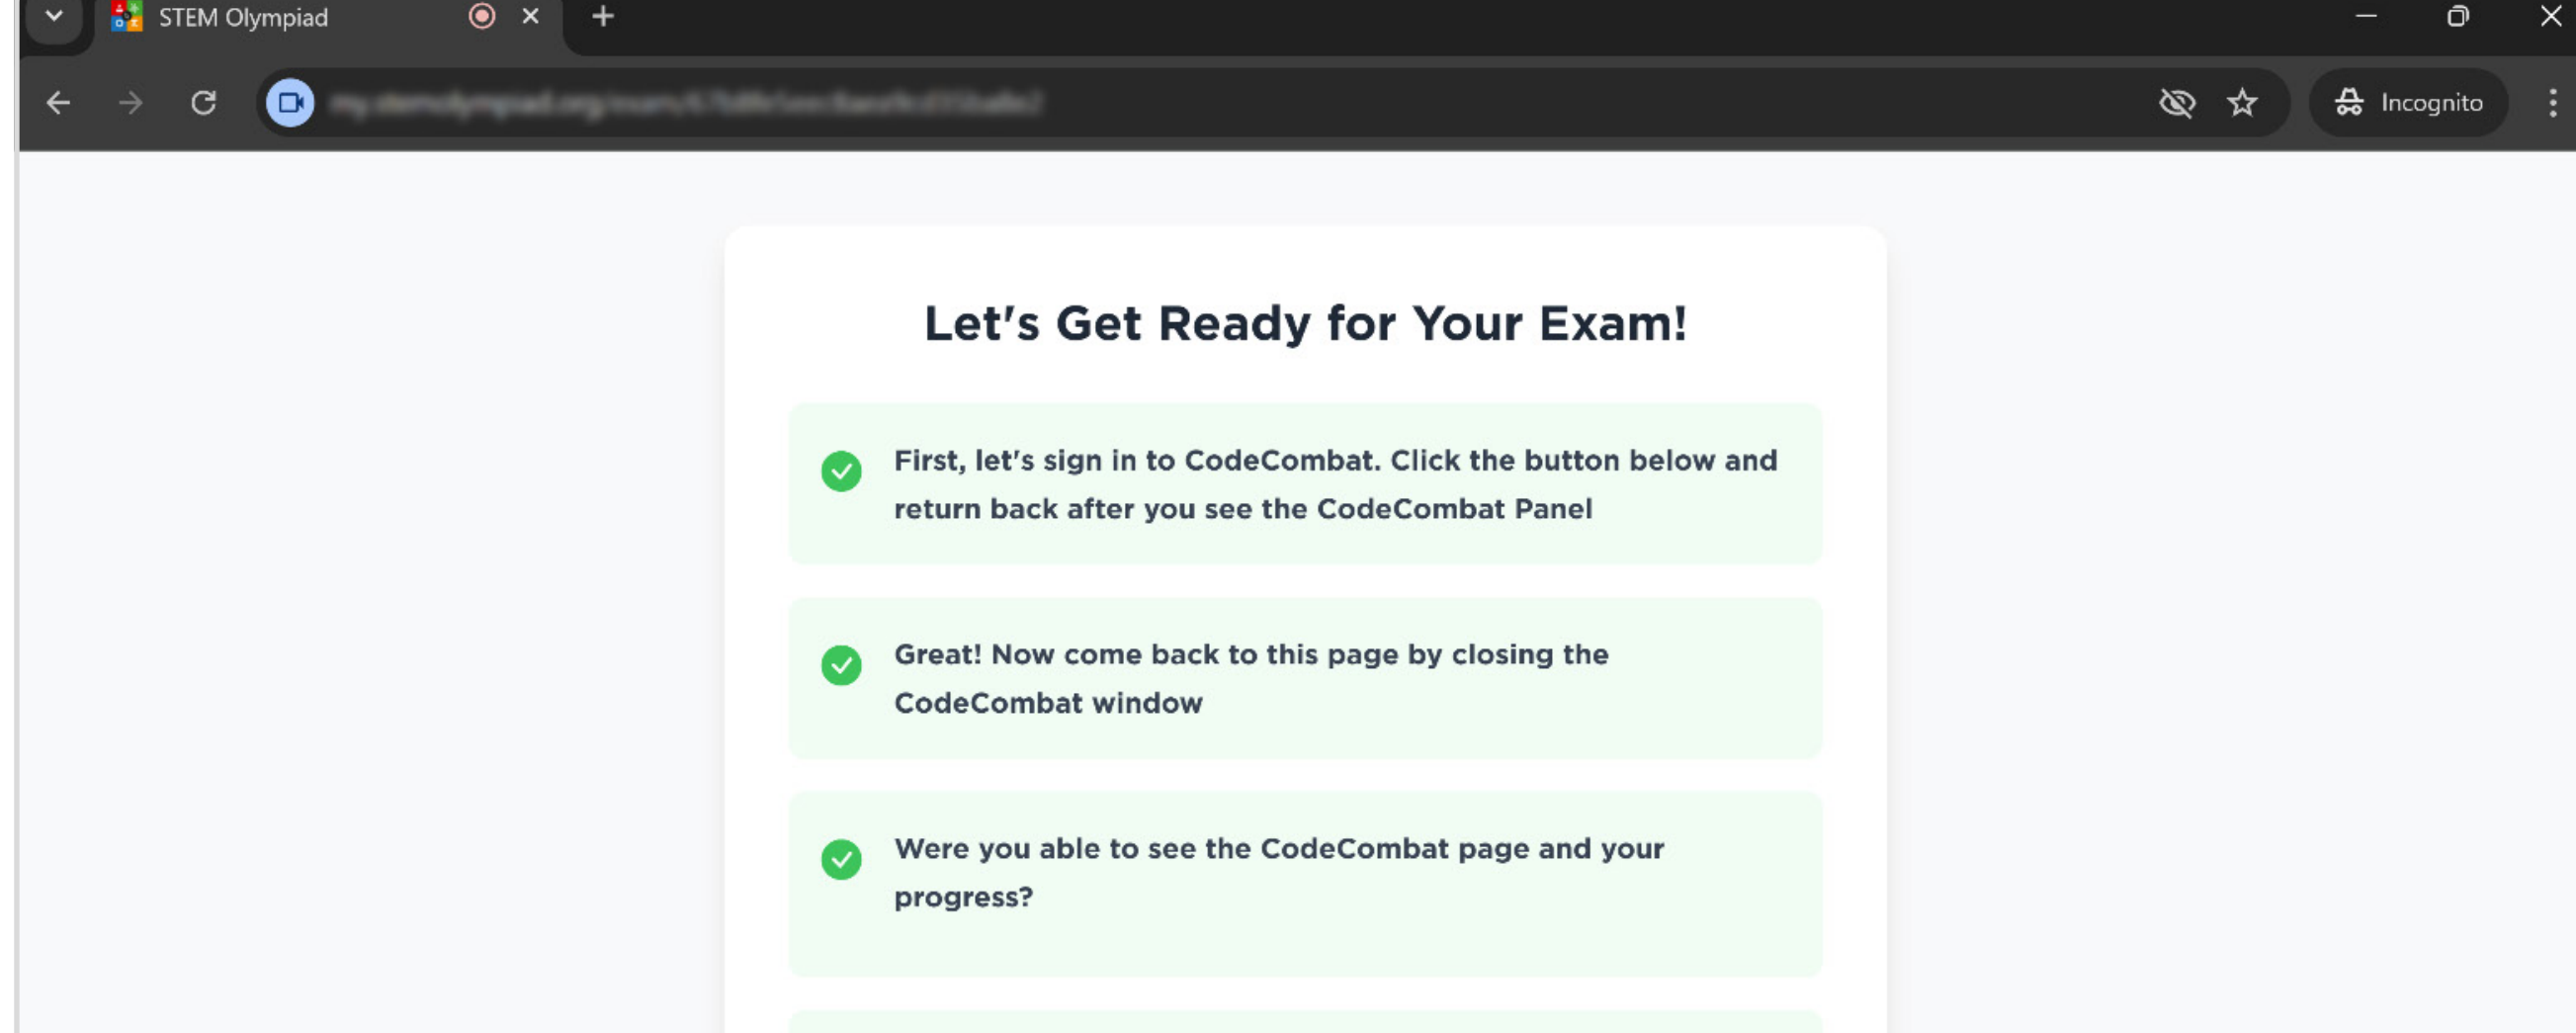

6. You will be redirected to your CodeCombat account. Well done, your sign-in process is complete. Please close this tab to return to the previous pop-up message.

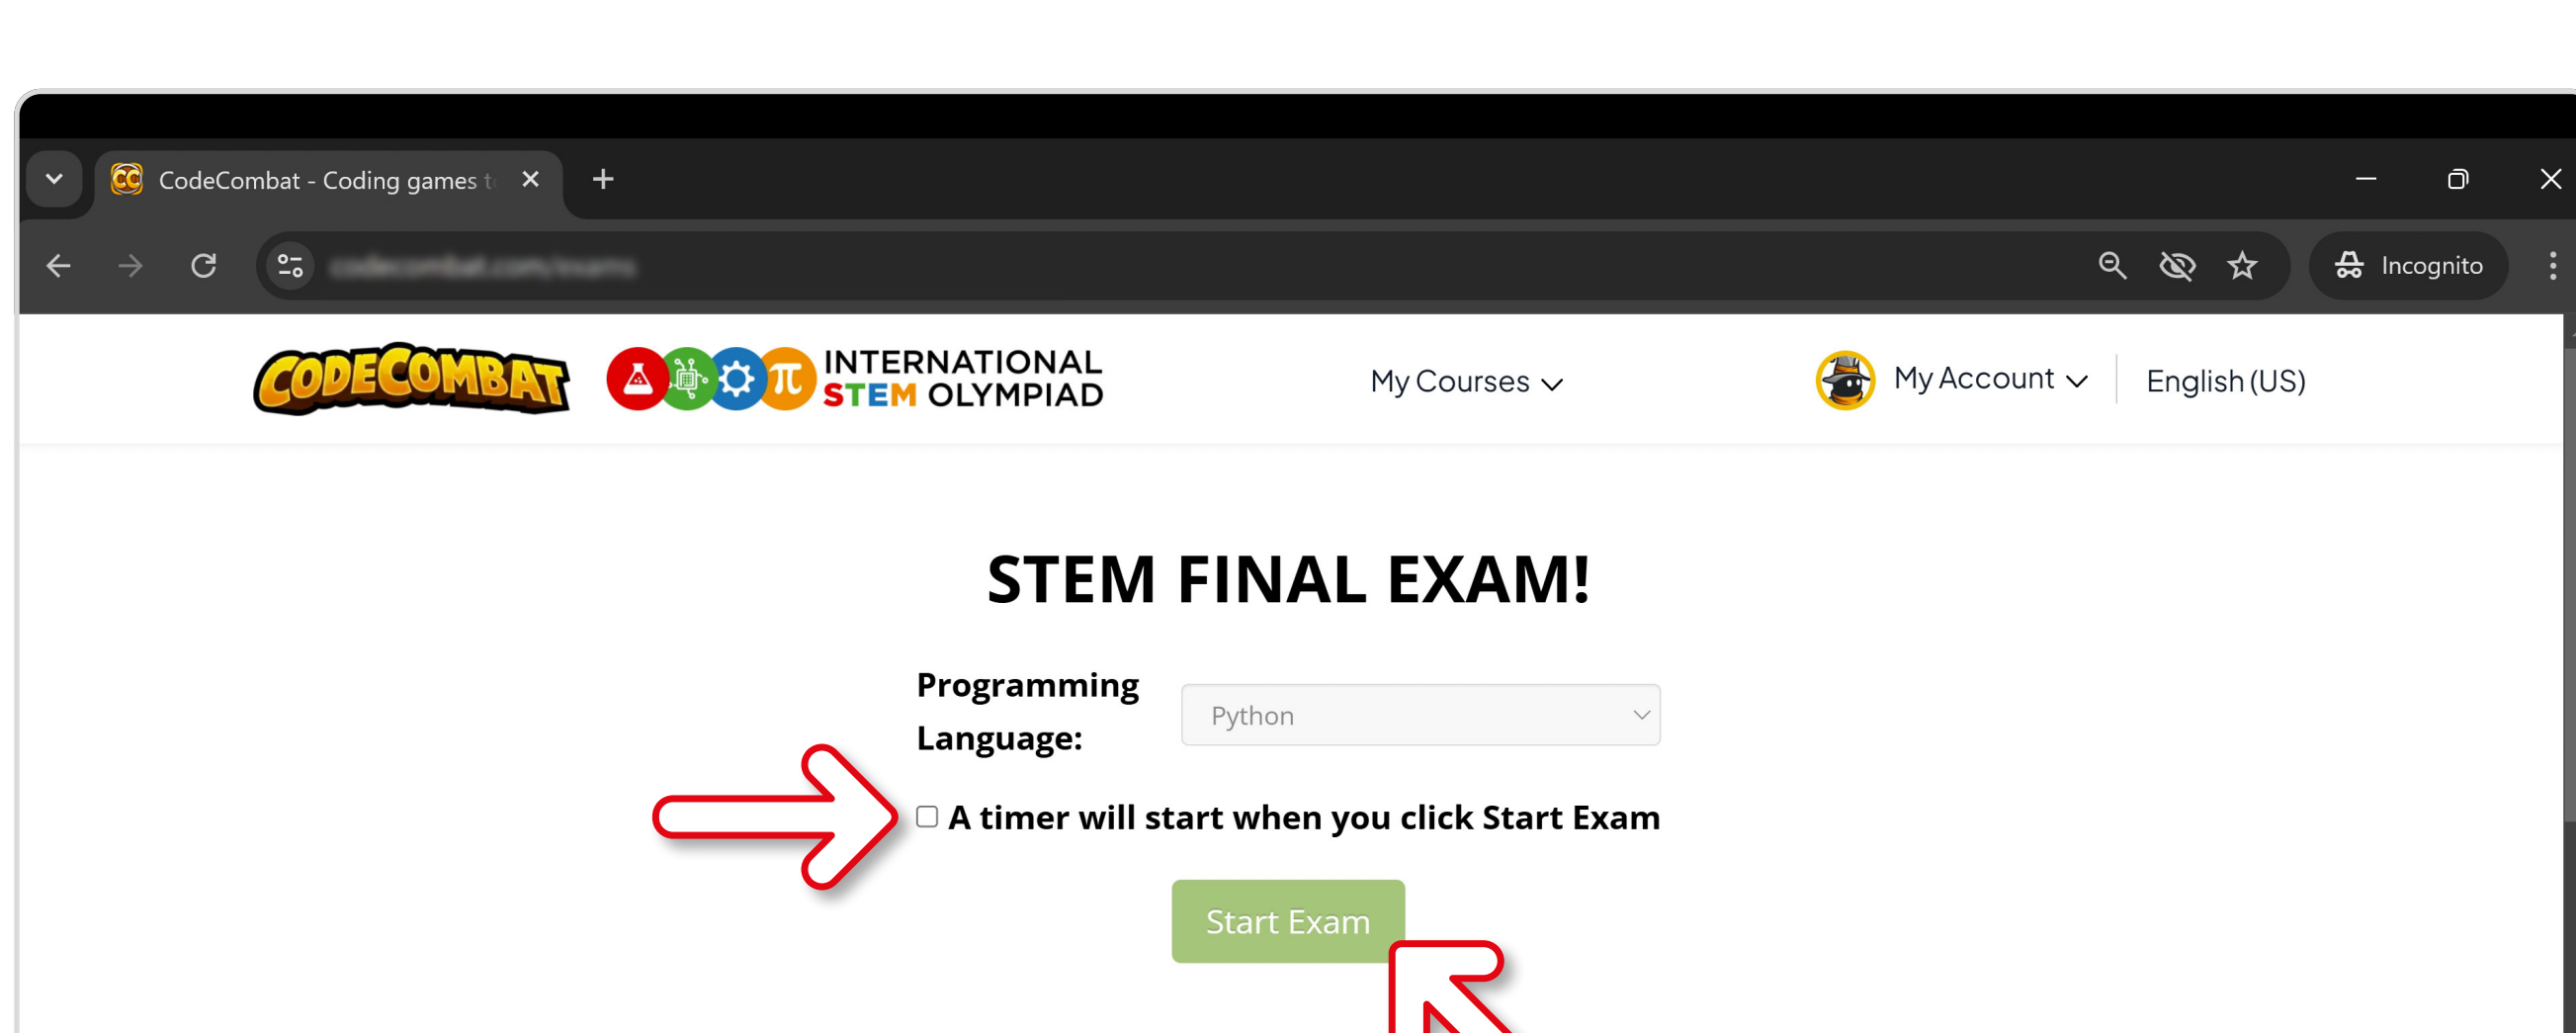

7. Now that your sign-in process is complete, you can click the green **START EXAM** button to start the exam.

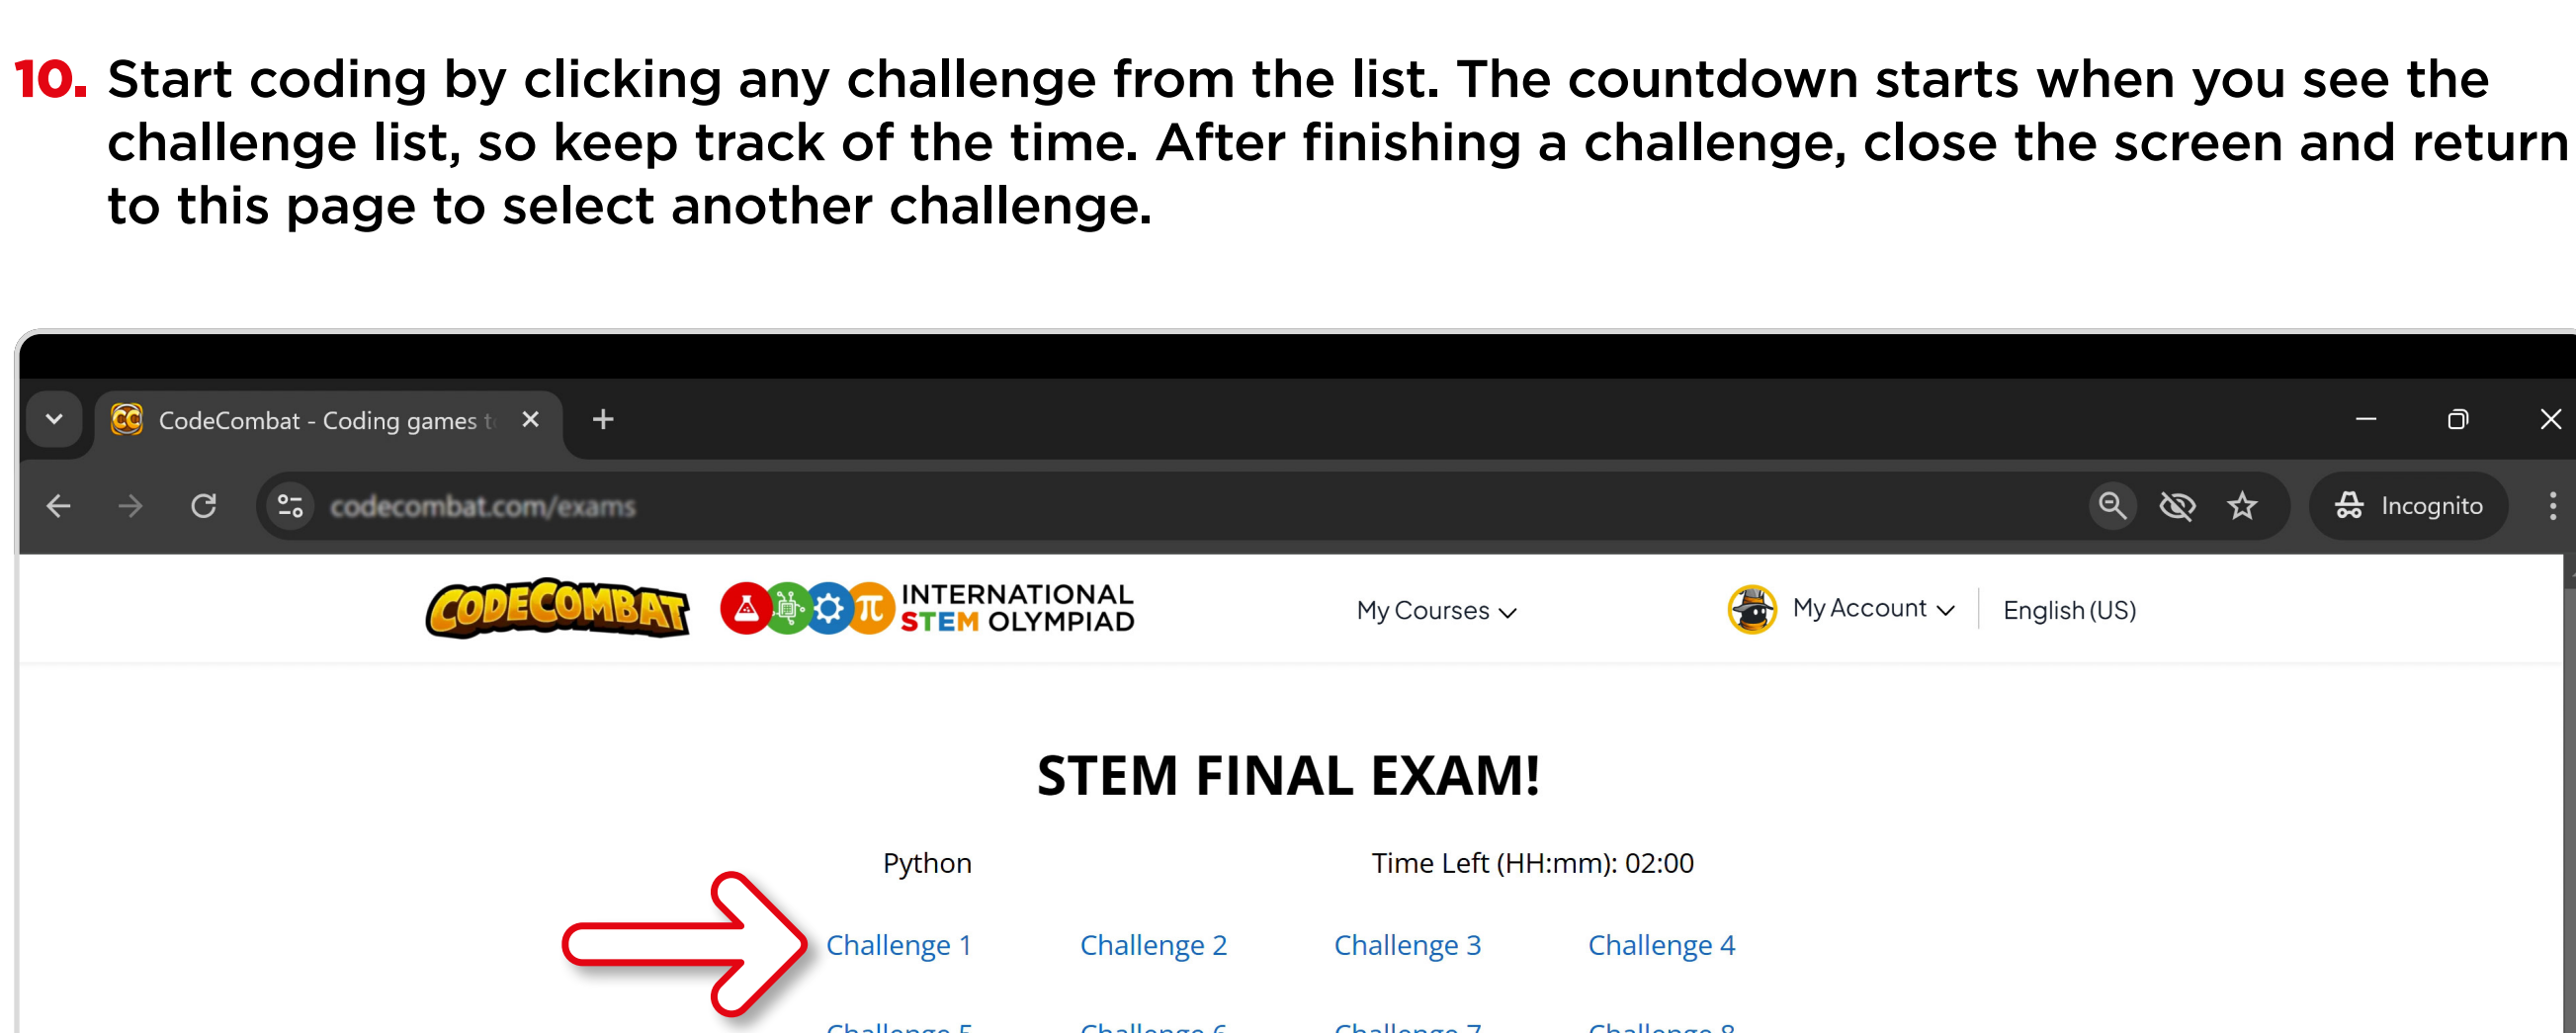

8. This may take a little time. Please wait patiently for the exam to start.

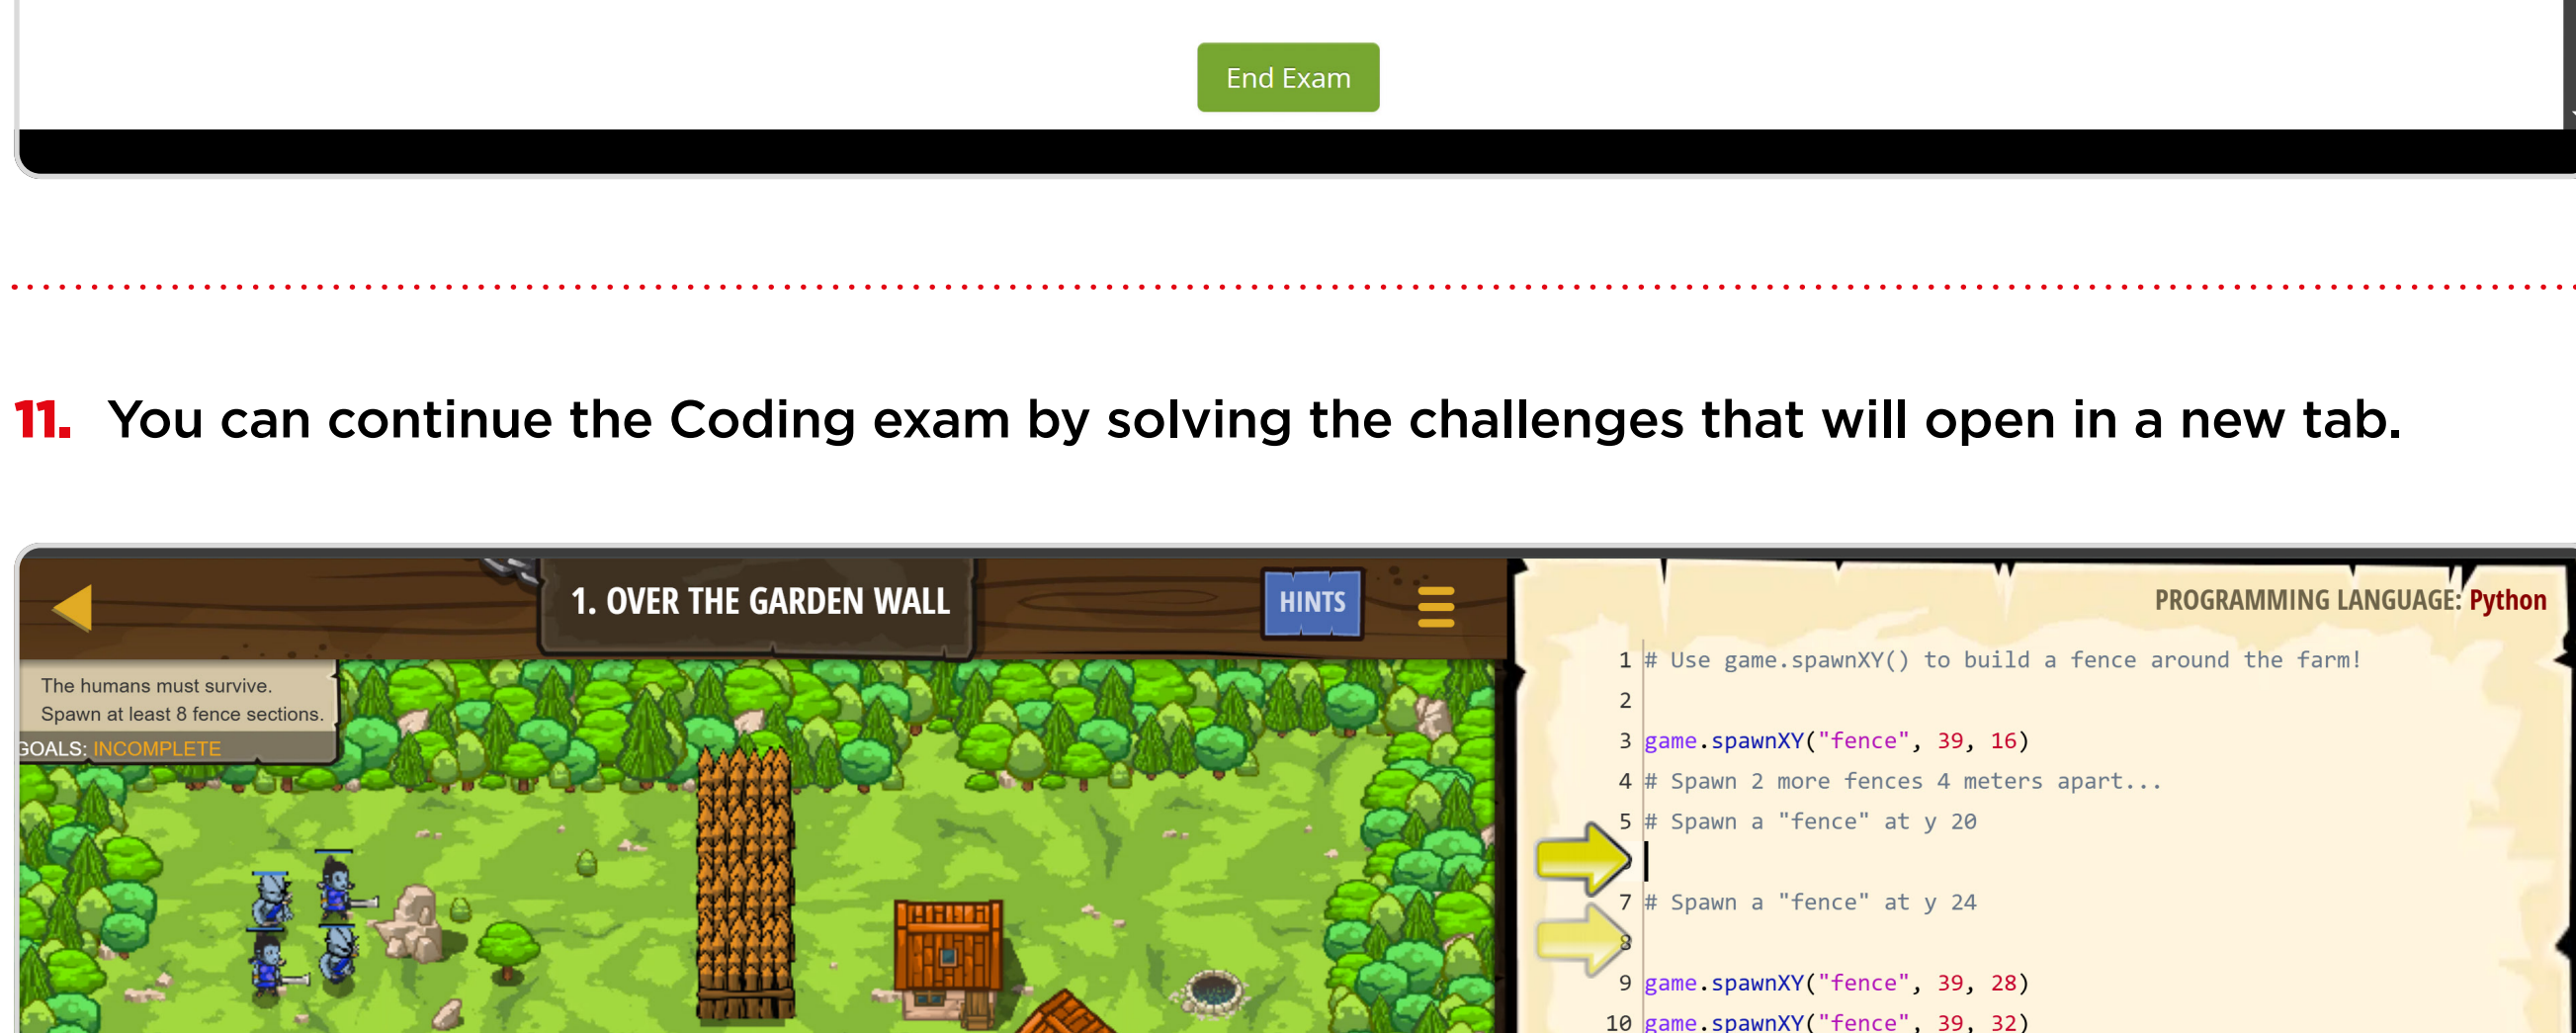

9. Tick the box and click the **START EXAM** button to continue.

10. Start coding by clicking any challenge from the list. The countdown starts when you see the challenge list, so keep track of the time. After finishing a challenge, close the screen and return to this page to select another challenge.

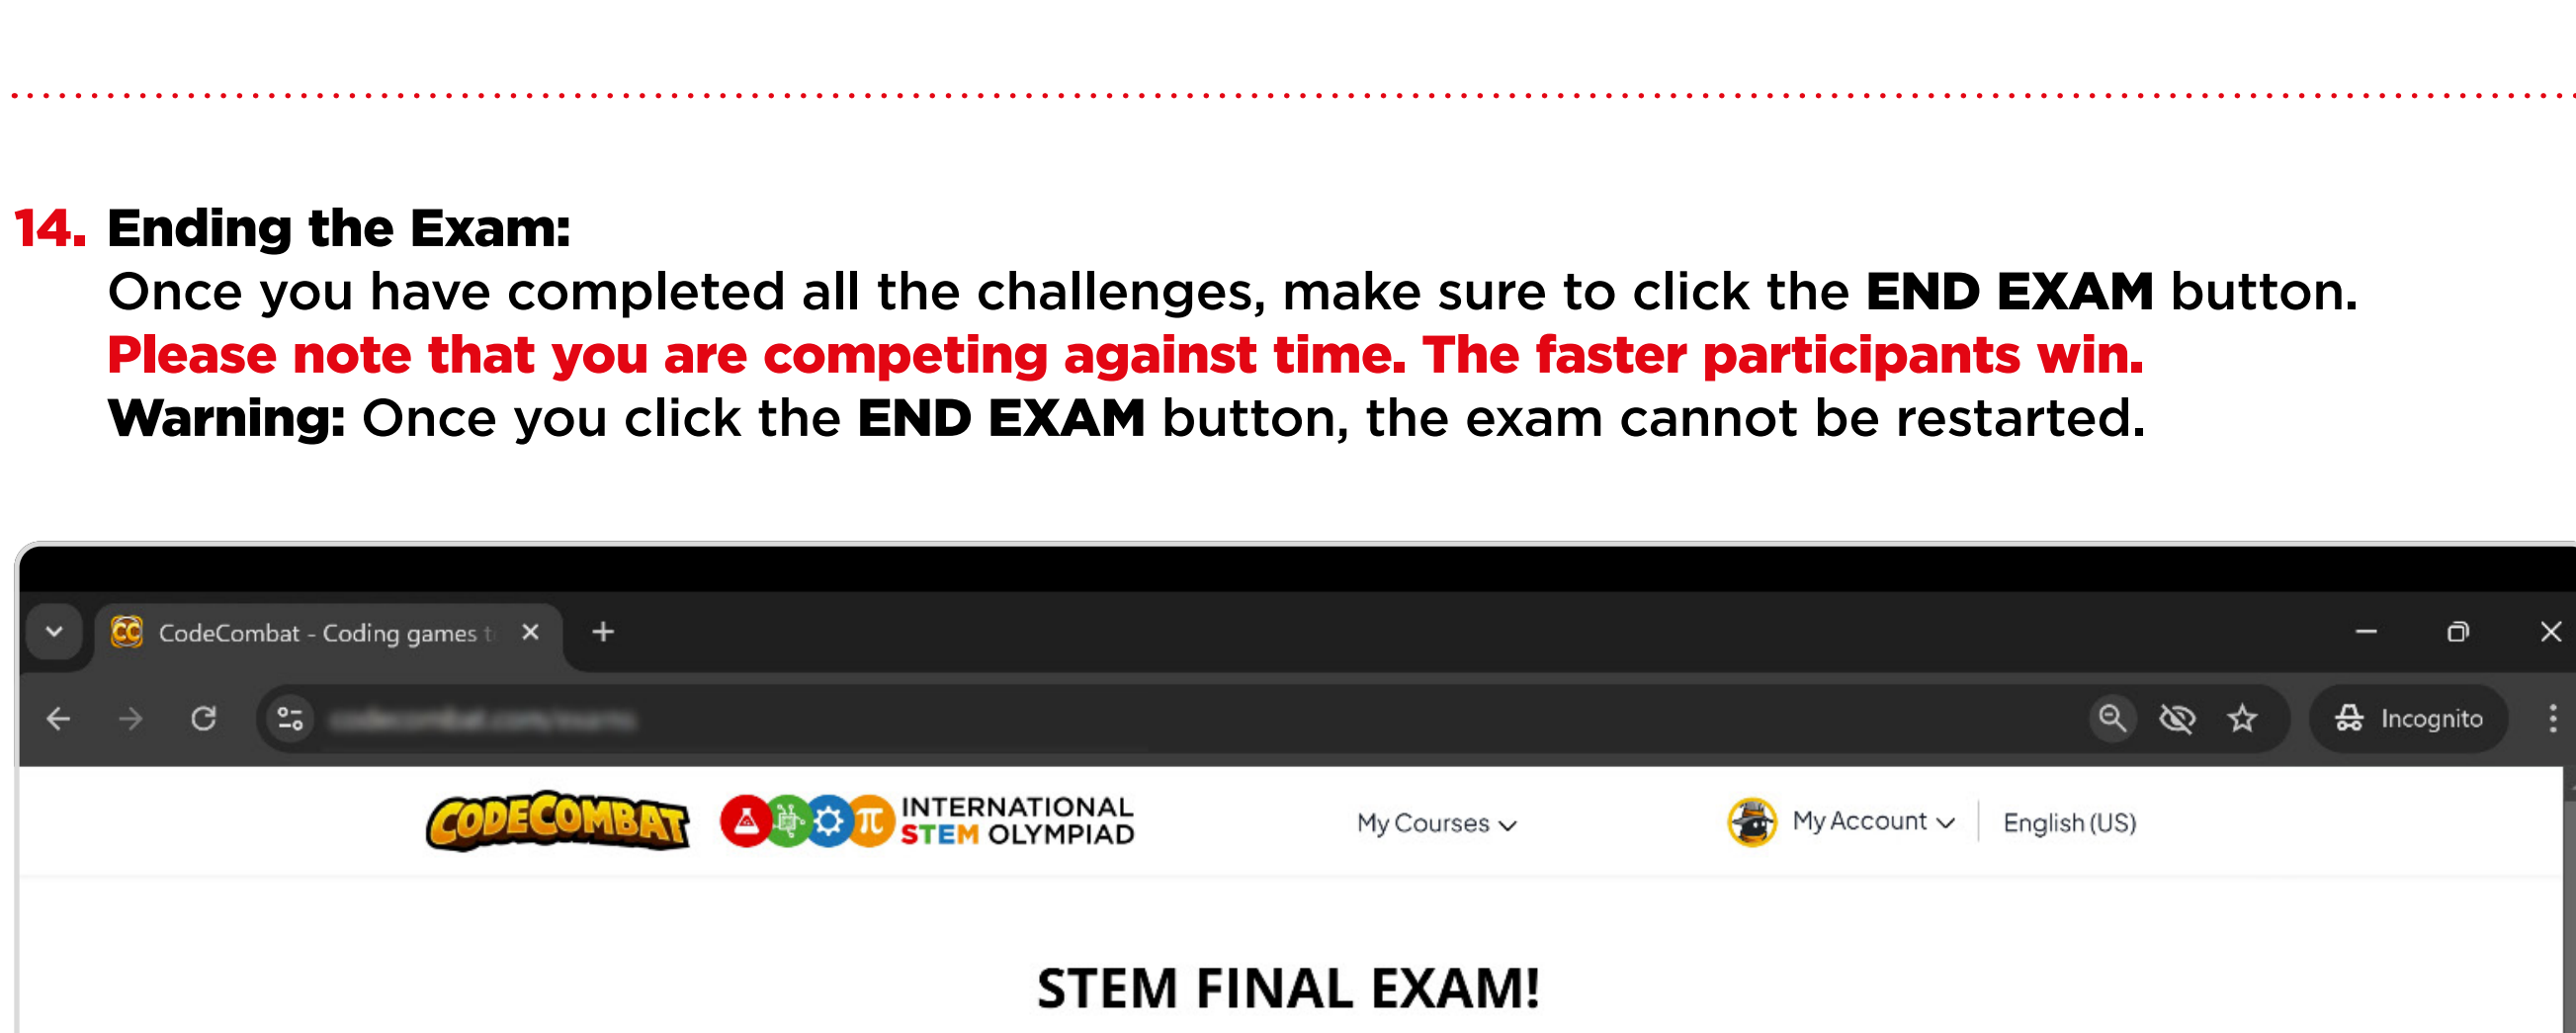

11. You can continue the Coding exam by solving the challenges that will open in a new tab.

12. Regarding Completed Challenges: Once you complete a challenge, close the current tab (the completed challenge page, not the browser) and proceed to the next challenge from the challenge list page.

13. Regarding Incomplete Challenges: If you cannot complete a challenge, close the current tab (the current challenge tab, not the browser) and proceed to the next challenge from the challenge list page.

14. Ending the Exam: Once you have completed all the challenges, make sure to click the **END EXAM** button. **Please note that you are competing against time. The faster participants win.** **Warning:** Once you click the **END EXAM** button, the exam cannot be restarted.

Good luck with your coding journey! With hard work and dedication, we hope you become skilled and successful specialists in the future!
